Storage cabinets made of white steel.
Used for tidily storing papers, cardboards, posters, prints, graphics, pictures to be framed, etc. The top surface can be used as a workbench or as a counter. 47 mm drawer depth.
A complete cabinet also needs a base and a top. It is possible to stack two or more cabinet bodies. In this case only one top is necessary. You can order the complete cabinet (base, body and top) or the single elements separately.

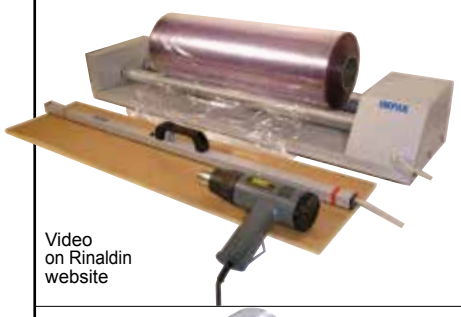
IMPAK shrink wrapping system



Video on Rinaldin website

This system is useful for giving a “shrink wrap” finish to frames and prints in order to protect them from dust, damage and UV rays.
Maximum width of film: 80 cm.

1) Place the item into the shrink film.
2) Slightly press the welding bar to cut and seal the film.
3) Heat the film with the air generator to shrink it.

The wrapping system is made of:
• a shrik film unroller
• a cutting and welding bar
• a hot air generator connected to an electrical outlet and
• a thermo-insulating mat 35x95 cm wide.
