## Painting of raw mouldings

Raw mouldings can be finished with open grain or closed grain.

Open grain: The paint is applied directly on the raw wood.

Closed grain: The trafil (or gesso) is first applied to prepare the moulding for subsequent processing. In this way the finish appears smooth and homogeneous.

Rinaldin proposes these colors:

For the closed grain finish, a water-based primer must first be applied

| White | 500 ml<br>2500 ml | € 13,30<br>52,00 | FB5<br>FB25 |

Over the base primer you can apply the same colors used for the open grain finish.

It is advisable to protect the colors with a clear flattening varnish

| Glossy | 500 ml | € 12,20 | FLATLUC |
| Satin  | 500 ml | 12,20   | FLATSAT |

With Aquagloss colors you get a wax effect finish. There is no need for base primer and no flattening varnish.
